# DIRECTORS' REPORT

The Directors present their report and audited financial statements for the year ended 31 December 2023.

#### **Principal activities**

The principal activities of the Company are that of an insurance Company licensed in terms of Section 7 of the Insurance Business Act, 1998 by the Malta Financial Services Authority ("MFSA") to write general business in Malta.

#### **Review of the business**

The Company's audited financial statements are prepared in accordance with IFRS 17 Insurance Contracts, which was adopted with effect from 1 January 2023. In complying with IFRS 17, the format of the Company's financial statements has changed markedly and required the restatement of comparative figures reported in previous years under IFRS 4. The balance sheet as at 31 December 2021, together with the profit and loss account for 2022 and the company's balance sheet as at 31 December 2022 were accordingly restated to IFRS 17. The net impact of the implementation of the new standard was a reduction of &228,476 in shareholders' funds as at 31 December 2022.

During the year under review the Company registered a profit before tax of  $\notin$ 9,144,867 compared to a restated loss before tax of  $\notin$ 2,511,855 in 2022. The improvement in profitability is mainly attributable to two factors, significant gains registered in the performance of our investment portfolio and a substantial recovery in our insurance technical result.

The Company's net investment return for the year amounted to a profit of  $\notin$ 4,498,660, compared to a loss of  $\notin$ 3,431,421 in 2022. The performance of the investment portfolio was significantly boosted by a sharp upswing in international equity markets.

Profit after tax for the year under review amounted to  $\notin$ 7,198,031 compared to a restated loss of  $\notin$ 1,381,923 for 2022.

Shareholders' funds amounted to €32,352,840 as at 31 December 2023. At the end of 2022, restated shareholders' funds totalled €27,354,809.

The Company is well capitalised with a Solvency II Capital Requirement ratio of 240% as 31 December 2023. This was achieved despite the fact that under Solvency II equity holdings attract a significant capital charge.

#### **Insurance operations**

Gross written premium for the year rose from €27,130,410 in 2022 to €31,375,685 in 2023, an increase of 15.6%. The robust underwriting performance resulted in an insurance service result of €9,900,788, more than double the €4,452,571 achieved in the previous year.

The Company's operating expenses increased to  $\notin$ 4,713,618 from  $\notin$ 4,015,204 in 2022. The combined operating ratio improved appreciably from a restated 95.9% in 2022 to 80.4% in 2023.

The introduction of the new integrated insurance and accounting software is planned for later in 2024. A considerable amount of management and staff time has been dedicated both to ensuring that the new software meets the needs of the Company and to ensure that the changeover to the new solution is smoothly implemented. We are confident that we will reap the benefits of this substantial investment in both capital and human effort in the years to come.

We are pleased to report that management has utilised a key module of the financial software package to prepare our audited financial statements in accordance with IFRS 17.

In addition to our investment in new software, we are well on the way of completing building works on new premises situated directly opposite our Head Office. The new building will no doubt help us to cater for the expansion of the Company and to accommodate the anticipated growth in human resources. We hope to complete works on this additional office by the end of 2024.

#### **Investment portfolio**

After a very difficult and disappointing 2022, in which we incurred a substantial investment loss of 11.6% amounting to €3,431,421, we are pleased to have registered a considerable improvement in our portfolio's return in 2023. Our investment portfolio reaped a return of 14.8% amounting to €4,498,660. The main reasons for the gain, relates to our exposure to US equities, a substantial percentage of which are invested in technology, communication and related business sectors. The trend in performance set in 2023 has continued over the first guarter of 2024. However, recent political developments in the Middle East have caused considerable turbulence in the investment world and it has become increasingly difficult to maintain a comparable return as registered over the last five quarters. The Company's Investment Committee meets regularly and closely monitors developments within international financial markets. It is also aware of its ESG obligations and keeps account of ESG score weightings when investing in financial assets.

#### **Associate Company**

2RS Elmo Insurance Managers Limited provided the Company with a return of  $\in$ 133,795 in 2023, compared to  $\in$ 155,630 in the previous year.

#### **Results and dividend**

The statement of profit and loss and other comprehensive income is set out on page 15 within. During the year under review the Company distributed net dividends amounting to  $\notin 2,200,000$  (2022: nil). The Directors do not recommend the payment of a final dividend.

#### **Principal risks and uncertainties**

The Company's principal risks and how these are identified and addressed are set out in Note 3 to the financial statements dealing with the management of insurance and financial risk.

The Directors' opinion on the inherent uncertainties surrounding the preparation of the financial statements is set out in Note 2 to the financial statements relating to critical accounting estimates and judgments.

#### Directors

The Directors of the Company who held office during the year were:

William Harding – Executive Chairperson David Bartoli - Managing Director Alan Bartoli – Non-Executive Director Roger Bellamy – Independent Non-Executive Director John Cooper - Non-Executive Director Godfrey Leone Ganado – Independent Non-Executive Director

Roger Bellamy, who has served as a member of the Board of Directors for the last 20 years, will not be seeking re-election. We thank Roger for his invaluable insight and his assistance throughout these years.

## Statement of Directors' responsibilities for the financial statements

The Directors are required by the Insurance Business Act, 1998 and the Maltese Companies Act, (Cap. 386) to prepare financial statements which give a true and fair view of the state of affairs of the Company as at the end of each financial period and of the profit or loss for that period.

In preparing the financial statements, the Directors are responsible for:

• ensuring that the financial statements have been drawn up in accordance with International Financial Reporting Standards as adopted by the EU;

• selecting and applying appropriate accounting policies;

• making accounting estimates that are reasonable in the circumstances;

• ensuring that the financial statements are prepared on the going concern basis unless it is inappropriate to presume that the Company will continue in business as a going concern.

The Directors are also responsible for designing, implementing and maintaining internal controls relevant to the preparation and the fair presentation of the financial statements that are free from material misstatement, whether due to fraud or error, and that comply with the Insurance Business Act, 1998 and the Maltese Companies Act, 1995. They are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The financial statements of Elmo Insurance Limited for the year ended 31 December 2023 are included in the Annual Report 2023, which is published in hard-copy printed form and may be made available on the Company's website. The Directors are responsible for the maintenance and integrity of the Annual Report on the website in view of their responsibility for the controls over, and the security of, the website. Access to information published on the Company's website is available in other countries and jurisdictions, where legislation governing the preparation and dissemination of financial statements may differ from requirements or practice in Malta.

#### Auditors

The auditors, PricewaterhouseCoopers, have indicated their willingness to continue in office and a resolution for their reappointment will be proposed at the Annual General Meeting.

By order of the Board

William Harding Chairman

"Elmo" Abate Rigord Street Ta' Xbiex. XBX 1111 Malta

6 May 2024

David Bartoli Managing Director

## Independent auditor's report

To the Shareholders of Elmo Insurance Limited

## Report on the audit of the financial statements

#### Our opinion

In our opinion:

- The financial statements give a true and fair view of the financial position of Elmo Insurance Limited (the Company) as at 31 December 2023, and of the company's financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards ('IFRSs') as adopted by the EU; and
- The financial statements have been prepared in accordance with the requirements of the Maltese Companies Act (Cap. 386).

Our opinion is consistent with our additional report to the Board of Directors.

#### What we have audited

Elmo Insurance Limited's financial statements, set out on pages 15 to 53 comprise:

- the statement of profit and loss account and other comprehensive income for the year ended 31 December 2023;
- the statement of financial position as at 31 December 2023;
- the statement of changes in equity for the year then ended;
- the statement of cash flows for the year then ended; and
- the notes to the financial statements, which include significant accounting policies and other explanatory information.

### Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the Financial Statements* section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

To the Shareholders of Elmo Insurance Limited

#### Independence

We are independent of the company in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) issued by the International Ethics Standards Board for Accountants (IESBA Code) together with the ethical requirements of the Accountancy Profession (Code of Ethics for Warrant Holders) Directive issued in terms of the Accountancy Profession Act (Cap. 281) that are relevant to our audit of the financial statements in Malta. We have fulfilled our other ethical responsibilities in accordance with these Codes.

To the best of our knowledge and belief, we declare that non-audit services that we have provided to the company are in accordance with the applicable law and regulations in Malta and that we have not provided non-audit services that are prohibited under Article 18A of the Accountancy Profession Act (Cap. 281).

The non-audit services that we have provided to the company, in the period from 1 January 2023 to 31 December 2023, are disclosed in note 6 to the financial statements.

#### *Our audit approach*

#### Overview

| Materiality       | • Overall materiality: €317,000, which represents 5% of the Company's 3-<br>year average absolute loss/profit before tax.   |
|-------------------|---|
| Key audit matters | <ul> <li>Transition methodology, judgements and related estimates used due to the implementation of IFRS 17</li> <li>Valuation of liability for incurred claims ('LIC') included in insurance contract liabilities</li> </ul> |

To the Shareholders of Elmo Insurance Limited

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we considered where the directors made subjective judgements; for example, in respect of significant accounting estimates that involved making assumptions and considering future events that are inherently uncertain. As in all of our audits, we also addressed the risk of management override of internal controls, including among other matters consideration of whether there was evidence of bias that represented a risk of material misstatement due to fraud.

We tailored the scope of our audit in order to perform sufficient work to enable us to provide an opinion on the financial statements as a whole, taking into account the structure of the company, the accounting processes and controls, and the industry in which the company operates.

#### Materiality

The scope of our audit was influenced by our application of materiality. An audit is designed to obtain reasonable assurance whether the financial statements are free from material misstatement. Misstatements may arise due to fraud or error. They are considered material if individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements.

Based on our professional judgement, we determined certain quantitative thresholds for materiality, including the overall materiality for the financial statements as a whole as set out in the table below. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures and to evaluate the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

| Overall<br>materiality                                      | €317,000  |
|---|---|
| How we<br>determined it                                     | 5% of the Company's 3-year average absolute loss/profit before tax  |
| Rationale for<br>the<br>materiality<br>benchmark<br>applied | We chose absolute loss/profit before tax as the benchmark because, in our view, profit is a key financial statement metric used in assessing the performance of the Company. We have applied a 3-year average absolute loss/profit before tax as reflected in the statement of profit and loss and other comprehensive income of 2021 to 2023 to reflect fluctuations in results in recent years. We selected 5% based on our professional judgement, noting that it is also within the range of commonly used accepted profit-oriented thresholds. |

We agreed with the directors that we would report to them misstatements identified during our audit above  $\bigcirc$  32,000 as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

To the Shareholders of Elmo Insurance Limited

#### Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

| Key audit matter  | How our audit addressed the Key audit matter  |
|---|---|
| Key audit matter<br>Transition methodology, judgements and<br>related estimates used due to the<br>implementation of IFRS 17<br>IFRS 17 became effective for periods beginning<br>on or after 1 January 2023, replacing IFRS 4,<br>'Insurance Contracts'. As a result, the<br>Company has adopted IFRS 17 fully<br>retrospectively and the 2022 opening<br>statement of financial position and the 2022<br>comparatives have been restated in order to<br>comply with the requirements of IFRS 17,<br>respectively.<br>Transition to IFRS 17 introduces significant<br>changes to the recognition, measurement and<br>presentation of (re) insurance contract<br>liabilities (and/or assets), and requires<br>significant judgement to estimate the impact<br>on 1 January 2022 (the transition date) and 31<br>December 2022 (comparative period). IFRS 17<br>adoption has resulted in a decrease in the<br>Company's accumulated profit at the transition<br>date ( $C_0.3m$ ). This is primarily due to the re-<br>measurement of insurance contracts<br>adjustment on adoption of IFRS 17.<br>The key methodology, judgements and<br>assumptions first applied on transition to the<br>new standard include:<br>1) Determination of eligibility for the<br>premium allocation approach ('PAA'); | <ul> <li>How our audit addressed the Key audit matter</li> <li>Our audit procedures addressing the implementation of IFRS 17, included <i>inter alia</i> the following procedures involving our IFRS 17 and actuarial specialist team members: <ul> <li>we assessed the methodology applied against IFRS 17 requirements and assessed the application of the methodology to the Company and its products, including PAA eligibility;</li> <li>we obtained an understanding of and challenged the key judgements and assumptions used to develop and calculate the transition balance sheet and restated comparative balances on adopting IFRS 17 using the fully retrospective approach, including the determination of the level of contract aggregation;</li> <li>we tested the inputs and outputs to/from the PAA model by inter alia performing substantive testing in relation to completeness and accuracy of data flows;</li> <li>we understood and challenged the methodology applied in calculating IFRS 17 (re)insurance contract liabilities (and/or assets), including risk adjustment (see separate key audit matter pertaining to 'Valuation of liabilities for incurred claims'); and</li> </ul> </li> </ul> |
|   | • we tested the adequacy and compliance<br>of the new quantitative and qualitative  |

adoption of IFRS 17.

## Key audit matters - continued

| Key audit matter   | How our audit addressed the Key audit matter  |
|--|---|
| The Company applied the PAA for measuring<br>contracts with a coverage period of one year or<br>less and for groups of contracts with a coverage<br>period exceeding one year, where the Company<br>reasonably expects that the measurement of<br>the liability for remaining coverage ('LRC')<br>does not differ materially from the one that<br>would be produced by applying the general<br>measurement model ('GMM'), at the inception<br>of the respective groups. The PAA eligibility<br>per group of contracts is regularly assessed, for<br>new groups of contracts. This assessment takes<br>into account qualitative and quantitative<br>factors determined by the Company.<br>The Company applied the PAA for measuring<br>contracts with a coverage period of one year or<br>less and for groups of contracts with a coverage<br>period exceeding one year, where the Company<br>reasonably expects that the measurement of<br>the liability for remaining coverage ('LRC')<br>does not differ materially from the one that<br>would be produced by applying the general<br>measurement model ('GMM'), at the inception<br>of the respective groups. The PAA eligibility<br>per group of contracts. This assessment takes<br>into account qualitative and quantitative<br>factors determined by the Company. | Based on the audit procedures performed, we consider the transition methodology, judgements and related estimates to be reasonable. |
| calculating IFRS 17 (re) insurance<br>contract liabilities (and/or assets),<br>including the risk adjustment.  |   |
| IFRS 17 (re) insurance contract liabilities<br>(and/or assets) comprise the liabilities for<br>incurred claims (that is explained in a separate<br>key audit matter below pertaining to 'Valuation<br>of liabilities for incurred claims') and the LRC.<br>The key assumptions pertaining to the LRC<br>include the allocation of expenses, and<br>actuarial estimation of future loss ratios.   |   |

## Key audit matters - continued

| Key audit matter  | How our audit addressed the Key audit matter |
|---|--|
| There is a risk that the eligibility for the PAA<br>and (re) insurance contract liabilities (and/or<br>assets) modelling is not appropriate and/or the<br>agreed methodology has not been<br>implemented correctly in the models. Further,<br>there is a risk that the key judgements and<br>estimates applied at transition, and for 2022<br>restatement, are not described in an<br>appropriate level of detail for users of the<br>financial statements to understand the<br>decisions made by management. |  |
| Relevant references in the financial statements are:  |  |
| <ul> <li>Changes in accounting policies and disclosures: Note 1.1;</li> <li>Summary of material accounting policies: Note 1;</li> <li>Significant judgements and estimates in applying IFRS 17: Note 2; and</li> <li>Note on insurance and reinsurance contracts: Note 15</li> </ul>  |  |

regarding the LIC are described in Note 2,

with additional information presented in

Note 15 to the financial statements.

### Key audit matters - continued

| Key audit matter   | How our audit addressed the Key audit matter   |
|--|--|
| Key audit matter<br>Valuation of liability for incurred claims<br>('LIC') included in insurance contract<br>liabilities<br>As described in notes 2 and 15 to the<br>financial statements, the LIC (which forms<br>part of the (re) insurance contract liabilities<br>(or assets)) reflects a current explicit,<br>unbiased and probability-weighted estimate<br>of the present value of the expected future<br>cash outflows (best estimate), and an explicit<br>risk adjustment for non-financial risk. The<br>valuation of the LIC is judgemental and<br>requires a number of assumptions to be<br>made that carry estimation uncertainty. This<br>is particularly the case for those liabilities<br>that are recognised in respect of claims that<br>have occurred, but have not yet been<br>reported ('IBNR') to the Company as some<br>claims can take some time to emerge or<br>develop. | <ul> <li>How our audit addressed the Key audit matter</li> <li>Our audit procedures addressing the valuation of the Company's LIC, including IBNR included the following procedures involving our actuarial specialist team members:</li> <li>applied our industry knowledge and experience in understanding and evaluating the reserving methodology, models and assumptions used, also assessing the consistency with IFRS 17 transition principles;</li> <li>we performed our own independent LIC projections on a sample basis, and compared the results to management's estimates;</li> <li>we independently assessed the reasonableness of the non-financial risk adjustment ('RA'), with due consideration of the confidence interval;</li> <li>we challenged management's methodology around the inclusion of</li> </ul> |
| The LIC is estimated by using recognised<br>actuarial methods, including analysis of<br>historical claims experience and relevant<br>benchmarks of similar businesses.<br>As at 31 December 2023, the Company<br>recorded a LIC of €19.6m in its statement of<br>financial position, of which €18.5m relates to<br>the present value of future cash flows<br>('PVFCF'), and €1.1m relates to the risk<br>adjustment for non-financial risk.<br>We focused on this area due to its inherent<br>subjectivity.  | <ul> <li>methodology around the inclusion of directly attributable expenses within LIC;</li> <li>we considered the quality of underlying data through testing of a sample of claims to underlying documentation, including bordereaux;</li> <li>we considered the quality of historical reserving by reviewing variations arising from prior year experience; and</li> <li>we considered the extent of related disclosures to the financial statements with emphasis on IFRS 17 requirements.</li> </ul>   |
| The accounting policies and critical accounting judgements and estimates   | Based on the work performed, we found the recorded LIC to be consistent with the   |

To the Shareholders of Elmo Insurance Limited

### Other information

The directors are responsible for the other information. The other information comprises the Directors' report (but does not include the financial statements and our auditor's report thereon).

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon except as explicitly stated within the *Report on other legal and regulatory requirements*.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

#### Responsibilities of the directors for the financial statements

The directors are responsible for the preparation of financial statements that give a true and fair view in accordance with IFRSs as adopted by the EU and the requirements of the Maltese Companies Act (Cap. 386), and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the company or to cease operations, or have no realistic alternative but to do so.

#### Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

To the Shareholders of Elmo Insurance Limited

As part of an audit in accordance with ISAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.
- Conclude on the appropriateness of the directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide directors with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with directors, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

To the Shareholders of Elmo Insurance Limited

## Report on other legal and regulatory requirements

The *Annual Report and Financial Statements 2023* contains other areas required by legislation or regulation on which we are required to report. The Directors are responsible for these other areas.

The table below sets out these areas presented within the Annual Report, our related responsibilities and reporting, in addition to our responsibilities and reporting reflected in the *Other information* section of our report. Except as outlined in the table, we have not provided an audit opinion or any form of assurance.

| Area of the Annual Report<br>and Financial Statements<br>2023 and the related<br>Directors' responsibilities  | Our responsibilities  | Our reporting   |
|---|---|---|
|   | We are required to consider<br>whether the information given in<br>the Directors' report for the<br>financial year for which the<br>financial statements are<br>prepared is consistent with the<br>financial statements.  | <ul> <li>In our opinion:</li> <li>the information given in the<br/>Directors' report for the<br/>financial year for which the<br/>financial statements are<br/>prepared is consistent with<br/>the financial statements; and</li> </ul>   |
| <b>Directors' report</b><br>(on pages 1 to 3)<br>The Maltese Companies<br>Act (Cap. 386) requires<br>the directors to prepare a<br>Directors' report, which<br>includes the contents<br>required by Article 177 of<br>the Act and the Sixth<br>Schedule to the Act. | We are also required to express<br>an opinion as to whether the<br>Directors' report has been<br>prepared in accordance with the<br>applicable legal requirements.<br>In addition, we are required to<br>state whether, in the light of the<br>knowledge and understanding of<br>the Company and its<br>environment obtained in the<br>course of our audit, we have<br>identified any material<br>misstatements in the Directors'<br>report, and if so to give an<br>indication of the nature of any<br>such misstatements. | <ul> <li>the Directors' report has<br/>been prepared in accordance<br/>with the Maltese Companies<br/>Act (Cap. 386).</li> <li>We have nothing to report to you<br/>in respect of the other<br/>responsibilities, as explicitly<br/>stated within the Other<br/>information section.</li> </ul> |

| Area of the Annual Report<br>and Financial Statements<br>2023 and the related<br>Directors' responsibilities | Our responsibilities   | Our reporting  |
|--|--|--|
|  | <ul> <li>Other matters on which we are required to report by exception</li> <li>We also have responsibilities under the Maltese Companies Act (Cap. 386) to report to you if, in our opinion:</li> <li>adequate accounting records have not been kept, or returns adequate for our audit have not been received from branches not visited by us.</li> <li>the financial statements are not in agreement with the accounting records and returns.</li> <li>we have not received all the information and explanations which, to the best of our knowledge and belief, we require for our audit.</li> </ul> | We have nothing to report to you<br>in respect of these<br>responsibilities. |

To the Shareholders of Elmo Insurance Limited

### Other matter - use of this report

Our report, including the opinions, has been prepared for and only for the Company's shareholders as a body in accordance with Article 179 of the Maltese Companies Act (Cap. 386) and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior written consent.

### Appointment

We were first appointed as auditors of the Company on 30 August 1976, for the year ended 31 December 1977. Our appointment has been renewed annually by shareholder resolution representing a total period of uninterrupted engagement appointment of 47 years. The company became licensed as an insurance undertaking in terms of the Maltese Insurance Business Act (Cap. 403) on 29 April 2004.

# NOTES TO THE FINANCIAL STATEMENTS

#### 1. Summary of material accounting policies

The principal accounting policies adopted in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

#### 1.1 Basis of preparation

These financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) as adopted by the EU, the Insurance Business Act, 1998 and the Maltese Companies Act, (Cap. 386). The financial statements are prepared under the historical cost convention as modified by the fair valuation of financial assets at fair value through profit or loss and the fair valuation of land and buildings.

The preparation of financial statements in conformity with IFRSs as adopted by the EU requires the use of certain accounting estimates. It also requires Directors to exercise their judgement in the process of applying the Company's accounting policies (see Note 2 - Critical accounting estimates and judgements in applying accounting policies).

The balance sheet is organised in increasing order of liquidity, with additional disclosures on the current or non-current nature of the Company's assets and liabilities provided within the notes to the financial statements.

#### 1.1.1 Changes in material accounting policies

The Company has initially applied IFRS 17 and IFRS 9, including any consequential amendments to other standards, from 1 January 2023. IFRS 17 has brought significant changes to the accounting for insurance and reinsurance contracts. As a result, the Company has restated certain comparative amounts and presented a third statement of financial position as at 1 January 2022.

Except for the changes below, the Company has consistently applied the accounting policies as set out in Note 1 to all periods presented in these financial statements.

The nature and effects of the key changes in the Company's accounting policies resulting from its adoption of IFRS 17 and IFRS 9 are summarised below.

#### 1.1.2 IFRS 17 Insurance Contracts

Changes to classification, measurement

The Company has applied the requirements of IFRS 17 for the recognition, measurement and presentation of insurance contracts retrospectively as of 1 January 2022. Initial application is made in accordance with the transition requirements of IFRS 17.

Under IFRS 17, the Company's insurance contracts issued and reinsurance contracts held are all eligible to be measured by applying the Premium Allocation Approach ("PAA"). The PAA simplifies the measurement of insurance contracts in comparison with the General Measurement Model ("GMM") in IFRS 17.

The measurement principles of the PAA differ from the 'earned premium approach' used by the Company under IFRS 4 in the following key areas:

• The liability for remaining coverage reflects premiums received less deferred insurance acquisition cash flows and less amounts recognised in revenue for insurance services provided.

• Measurement of the liability for remaining coverage includes an adjustment for the time value of money and the effect of financial risk where the premium due date and the related period of services are more than 12 months apart.

• Measurement of the liability for remaining coverage involves an explicit evaluation of risk adjustment for nonfinancial risk when a group of contracts is onerous to calculate a loss component (previously these may have formed part of the unexpired risk reserve provision).

• Measurement of the liability for incurred claims (previously claims outstanding and incurred-but-not reported (IBNR) claims) is determined on a discounted probability-weighted expected value basis and includes an explicit risk adjustment for non-financial risk. The liability includes the Company's obligation to pay other incurred insurance expenses.

• Measurement of the asset for remaining coverage (reflecting reinsurance premiums paid for reinsurance held) is adjusted to include a loss-recovery component to reflect the expected recovery of onerous contract losses where such contracts reinsure onerous direct contracts.

• Measurement of the asset for incurred claims (previously reinsurers' share of claims outstanding, and reinsurers' share of incurred-but-not reported (IBNR) claims) is determined on a discounted probability-weighted expected value basis and includes an explicit risk adjustment for non-financial risk.

The Company has applied the premium allocation approach ('PAA') to:

• all the groups of the (re) insurance contracts that it issues and reinsurance contracts that it holds with a coverage period of not more than one year; or

• to those groups of contracts with a coverage period exceeding one year, given that the Company has demonstrated that it reasonably expects that the value of the liability for remaining coverage under the PAA approach does not differ materially to when this is measured under the GMM, at the inception of the respective groups.

The Company's classification and measurement of insurance and reinsurance contracts is explained in Note 1.16.

#### Transition

#### Impact on equity and the result

In applying IFRS 17 for the first time, at the time of transition as at 1 January 2022:

a) All groups of insurance contracts issued and reinsurance contracts held are identified, recognised and measured in accordance with the requirements of IFRS 17;
b) Balances that would not exist in accordance with the requirement of IFRS 17 are derecognised; and
c) The resulting net difference is recognised in equity.

#### Full retrospective approach

On transition to IFRS 17, the Company has applied the full retrospective approach to all (re) insurance contracts issued and reinsurance contracts held on or after 1 January 2022. The Company has determined that reasonable and supportable information was available for all contracts in force at the transition date that were issued within three years prior to the transition.

In addition, for (re) insurance contracts originated by the Company, which were eligible for the PAA, the Company concluded that only current and prospective information was required to reflect circumstances at the transition date, which made the full retrospective application practicable.

As explained above, IFRS 17 differs from IFRS 4 in a number of ways. The impact of the measurement of in-scope contracts in accordance with IFRS 17 on the Company's equity is shown below.

Initial application of IFRS 17 had the following impact on equity as at 1 January 2022.

| Equity (IFRS 4) as at 1 January<br>Change in equity | 29,041,610 |
|---|------------|
| Remeasurement under PAA                             | 220,098    |
| Risk adjustment for non-financial risk              | (689,142)  |
| Deferred taxes                                      | 164,166    |
| Equity (IFRS 17) as at 1 January                    | 28,736,732 |

The transition to IFRS 17 has not affected the economic opportunities and risks of the insurance business for the Company. Further details of the specific IFRS 17 accounting policies applied are described in more detail in note 1.16.

#### 1.1.3 IFRS 9 Financial Instruments

#### Classification of financial assets and financial liabilities

IFRS 9 includes three principal classification categories for financial assets: measured at amortised cost (AC), fair value through other comprehensive income (FVOCI) and FVTPL. The classification of financial assets under IFRS 9 is generally based on the business model in which a financial asset is managed and its contractual cash flow characteristics. IFRS 9 eliminates the previous IAS 39 categories of held-tomaturity investments, loans and receivables, and availablefor-sale financial assets.

For an explanation of how the Company classifies and measures financial assets and accounts for related gains and losses under IFRS 9, see Note 1.9. IFRS 9 has not had a material effect on the Company's accounting policies for financial liabilities.

#### Impairment of financial assets

IFRS 9 replaces the 'incurred loss' model in IAS 39 with a forward-looking 'expected credit loss' (ECL) model. The new impairment model applies to financial assets measured at AC. Under IFRS 9, credit losses are recognised earlier than under IAS 39. (see Note 1.9).

#### Transition

The general principle in IFRS 9 is for retrospective application in accordance with IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors. IFRS 9 contains however certain exemptions from full retrospective application. These include an exemption from the requirement to restate comparative information about classification and measurement, including impairment. If an insurer does not restate prior periods, then opening retained earnings (or other components of equity, as appropriate) for the annual reporting period that includes the date of initial application (1 January 2023) is adjusted for any difference between the carrying amounts of financial instruments before adoption of IFRS 9 and the new carrying amounts. Insurers are allowed to restate comparatives if, and only if, this is possible without the use of hindsight. If an insurer restates prior periods, then the restated financial information must reflect all of IFRS 9's requirements except for items that have been derecognised prior to the date of initial application. The Company has opted not to restate prior period financial information to reflect the impact of IFRS 9. Its previously explained that the adoption of IFRS 9 did not have a material impact on the Company's financial statements.

As permitted by IFRS 7, and also in consideration of the immaterial impact upon adoption, the Company has not disclosed information about the line item amounts that are reported in accordance with the classification and measurement (including impairment) requirements of IFRS 9 for 2022 and those that would have been reported

in accordance with the classification and measurement

#### Effect of initial application

requirements of IAS 39 for 2023.

The classification of financial assets is based on the business model under which the financial assets are managed and on the "solely payments of principal and interest" (SPPI) criteria. Similarly to IAS 39, the Company's financial investments are classified as FVTPL, these include debt instruments that pass the SPPI test and are held within a 'hold to collect' business model, but which the Company opted to measure at FVTPL and equity instruments. Deposits with banks or credit institutions included under financial investments, Cash at bank and in hand and other receivables are classified as amortised cost, similar to IAS 39. The company does not consider the reclassifications from IAS 39 to IFRS 9 to be material.

## 1.1.4 Standards, interpretations and amendments to published standards that are not yet effective

A number of new standards and amendments to standards and interpretations are effective for annual periods beginning after 1 January 2023 and have not been applied in preparing these financial statements. The Company is considering the implications of these standard on the Company's financial results and position, and the timing of their adoption, taking cognisance of the endorsement process by the European Commission.

#### 1.2 Foreign currency translation

#### Functional and presentation currency

Items included in the financial statements are measured using the currency of the primary economic environment in which the entity operates ("the functional currency"). The financial statements are presented in euro ( $\in$ ), which is the Company's functional and presentation currency.

#### Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement within administrative expenses.

#### 1.3 Revenue recognition

Revenue comprises the fair value for services and is recognised as follows:

#### Rendering of services

Premium recognition is described in accounting policy 1.16 dealing with insurance contracts.

#### Interest income

Interest income from financial assets not classified as fair value through profit or loss is recognised on a time proportionate basis using the effective interest method. When a receivable is impaired, the Company reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument and continues unwinding the discount as interest income.

#### Dividend income

Dividend income is recognised when the right to receive payment is established.

Other net fair value gains or losses from financial assets at fair value through profit or loss

Other gains or losses arising from changes in the fair value of the 'Financial assets at fair value through profit or loss' category are presented in the profit and loss account within 'investment income' in the period in which they arise.

#### 1.4 Investment return

Investment return includes dividend income, other net fair value movements on financial assets at fair value through profit or loss (including interest income from financial assets, classified as fair value through profit or loss), interest income from financial assets not classified as fair value through profit or loss and is net of investment expenses, charges and interest.

#### 1.5 Property, plant and equipment

Tangible assets comprising land and buildings, office furniture and equipment and motor vehicles are initially recorded at cost. Property is subsequently shown at market value, based on valuations by external independent valuers, less subsequent depreciation. Valuations are carried out on a regular basis such that the carrying amount of property does not differ materially from that which would be determined using fair values at the reporting date. All other plant and equipment are subsequently stated at historical cost less depreciation.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to the profit and loss account during the financial period in which they are incurred.

Increases in the carrying amount arising on revaluation are credited to the revaluation reserve in shareholders' equity. Decreases that offset previous increases of the same asset are charged against the revaluation reserve; all other decreases are charged to the income statement.

Depreciation is calculated on the straight-line method to write off the cost of the assets, other than land, to their residual values over their estimated useful life as follows:

|                                | 70 |
|--------------------------------|----|
| Buildings                      | 2  |
| Improvement to buildings       | 10 |
| Office furniture and equipment | 20 |
| Motor vehicles                 | 20 |

0/

The assets' residual values and useful lives are reviewed and adjusted as appropriate at each reporting date.

Gains and losses on disposals are determined by comparing proceeds with carrying amount and are included in the profit and loss account.

Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount.

#### 1.6 Investment property

Property that is held for long-term rental yields or for capital appreciation or both, and that is not occupied by the Company is classified as investment property.

Investment property is measured initially at its historical cost, including related transaction costs and borrowing costs. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Borrowing costs which are incurred for the purpose of acquiring or constructing a qualifying investment property are capitalised as part of its cost. Borrowing costs are capitalised while acquisition or construction is actively underway.

Capitalisation of borrowing costs is ceased once the asset is substantially complete and is suspended if the development of the asset is suspended. After initial recognition, investment property is carried at fair value, representing open market value determined annually. Fair value is based on active market prices, adjusted, if necessary, for any difference in the nature, location or condition of the specific asset.

The fair value of investment property reflects, among other things, rental income from current leases and assumptions about rental income from future leases in the light of current market conditions. The fair value also reflects, on a similar basis, any cash outflows that could be expected in respect of the property.

Subsequent expenditure is capitalised to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost of the item can be measured reliably. All other repairs and maintenance costs are charged to profit or loss during the financial period in which they are incurred. When part of an investment property is replaced, the carrying amount of the replaced part is derecognised.

The fair value of investment property does not reflect future capital expenditure that will improve or enhance the property and does not reflect the related future benefits from this future expenditure other than those a rational market participant would take into account when determining the value of the property.

Changes in fair values are recognised in profit or loss. Investment properties are derecognised either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal.

#### 1.7 Intangible assets - Computer software

Acquired computer software licences are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised using the straight-line method over their estimated useful lives of 4 years.

Costs associated with developing or maintaining computer software programmes are recognised as an expense as incurred.

#### 1.8 Investment in associated undertakings

Associated undertakings are all entities over which the Company has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associated undertakings are accounted for by the equity method of accounting and are initially recognised at cost.

Equity accounting involves recognising in the profit and loss account, the Company's share of the associate's profit or loss for the year and the share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the cost of the investment. Dividend received or receivable from associates are recognised as a reduction in the carrying amount of the investment."

The Company's investment in associated undertaking is carried in the balance sheet at an amount that reflects its share of the net assets of the associate and includes goodwill (net of any accumulated impairment loss) on acquisition. Equity accounting is discontinued when the carrying amount of an investment in an associated undertaking reaches zero unless the Company has incurred obligations or guaranteed obligations in respect of the associated undertaking. Unrealised gains on transactions between the Company and its associates are eliminated to the extent of the Company's interest in these entities. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred."

On disposal of an investment, the difference between the net disposal proceeds and the carrying amount is charged or credited to the profit and loss account. The Carrying amount of equity-accounted investments is tested for impairment in accordance with the policy described in note 1.10(b).

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the identifiable net assets of the acquired associate at the date of acquisition. Goodwill on acquisitions of associates is included in 'investment in associated undertakings'.

Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

#### 1.9 Financial assets

#### Classification

The Company has the option to classify its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through OCI or through profit or loss), and

- those to be measured at amortised cost.

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

The Company classifies all of its financial investments, including equities and debt instruments, in the fair value through profit and loss category ("FVPL"). Deposits with banks or credit institutions are classified in the amortised cost category.

The Company reclassifies debt investments when and only when its business model for managing those assets changes.

#### **Recognition and derecognition**

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Company commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Company has transferred substantially all the risks and rewards of ownership. The Company recognises a financial asset in statement of financial position when it becomes a party to the contractual provisions of the instrument.

#### Measurement

At initial recognition, the Company measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the acquisition of the financial asset. Transaction costs of financial assets carried at FVPL are expensed in profit or loss. Financial assets with embedded derivatives are considered in their entirety when determining whether their cash flows are solely payments of principal and interest.

#### Debt instruments

Subsequent measurement of debt instruments depends on the Company's business model for managing the asset and the cash flow characteristics of the asset. As previously explained, the Company classifies it debt instruments in the FVPL category. A gain or loss on a debt investment that is subsequently measured at FVPL is recognised in profit or loss and presented net within other gains/(losses) in the period in which it arises.

#### Other receivables

Trade receivables are amounts due from customers for services performed in the ordinary course of business. They are generally due for settlement within 30 days and therefore are all classified as current. Trade receivables are recognised initially at the amount of consideration that is unconditional unless they contain significant financing components, when they are recognised at fair value. The Company holds the trade receivables with the objective to collect the contractual cash flows and therefore measures them subsequently at amortised cost using the effective interest method.

#### Cash and cash equivalents

Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. Accordingly, cash and cash equivalents comprise cash in hand, deposits held at call with banks and term placements with banks having an original term of three months or less.

#### Equity instruments

Equity instruments are those that meet the definition of equity from an issuer's perspective (i.e. instruments that do not contain a contractual obligation to pay and that evidence a residual interest in the issuer's net assets). Examples of equity instruments include basic ordinary shares.

The Company measures all equity investments at FVTPL. Gains and losses on equity instruments measured at FVTPL are included in other net investment revenue/(losses) in the statement of profit or loss and other comprehensive income.

The Company does not apply the fair value through other comprehensive income option.

#### Impairment

Financial assets classified under the FVPL category are not subject to expected credit losses.

IFRS 9 requires the measurement of credit loss allowances on financial instruments using the expected credit loss ("ECL") impairment model utilising a forward-looking approach that emphasises shifts in the credit risk attached to a financial instrument, and consequently the probability of future credit losses, even if no loss events have yet occurred. IFRS 9 outlines a 'three-stage' model for impairment based on changes in credit quality since initial recognition. The key driver of the measurement of ECLs therefore relates to the level of credit risk for each exposure and, as a result, an assessment of the change in credit risk over the expected life of an asset is a core element in determining the staging criteria under IFRS 9. The three stages under IFRS 9 are as follows:

Stage 1 - Financial instruments that have not had a significant increase in credit risk (SICR) since initial recognition, or that have "low credit risk" at the reporting date are classified in Stage 1. 12-month ECLs are recorded to measure the expected losses that result from default events that are possible within 12 months after the reporting date;

Stage 2 - Financial instruments that have experienced a SICR since initial recognition are classified in Stage 2. Lifetime ECLs are recorded to measure the expected losses that result from all possible default events over the expected life of the financial instrument; and

Stage 3 – Financial instruments that demonstrate objective evidence of impairment, and which are considered to be in default or credit-impaired, are classified in Stage 3, also requiring the measurement of lifetime ECLs.

The Company has two types of financial assets that are subject to the expected credit loss model:

- deposits with banks and credit institutions; and - other receivables

The identified impairment losses are deemed to be insignificant.

#### Other receivables

For trade receivables, the Company applies the simplified approach permitted by IFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables. To measure the expected credit losses, trade receivables are grouped based on shared credit risk characteristics and the days past due. The expected loss rates are based on the payment profiles and historical credit losses of the Company. The historical loss rates are adjusted to reflect current and forward looking information on macroeconomic factors affecting the ability of the customers to settle the receivables.

Other receivables are written off when there is no reasonable expectation of recovery. Indicators that there is no reasonable expectation of recovery include, amongst others, the failure of a debtor to engage in a repayment plan with the Company, and a failure to make contractual payments.

Impairment losses on trade receivables are presented as net impairment losses within operating profit. Subsequent recoveries of amounts previously written off are credited against the same line item.

#### 1.10 Impairment of non-financial assets

Assets that are subject to amortisation or depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cashgenerating units).

#### 1.11 Share capital

Shares are classified as equity when there is no obligation to transfer cash or other assets.

#### 1.12 Dividends

Dividends on ordinary shares are recognised in equity in the period in which they are declared.

#### 1.13 Current and deferred tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the profit and loss account, except to the extent that it relates to items recognised directly in equity. In this case, the tax is also recognised in equity.

Deferred tax is recognised using the liability method for all temporary differences arising between the tax bases of assets and liabilities and their carrying values for financial reporting purposes. However, if the deferred income tax arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss, it is not accounted for. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the end of the reporting period and are expected to apply when the related deferred tax asset is realised or the deferred tax liability is settled.

Deferred tax assets are recognised only to the extent that future taxable profit will be available against which the temporary differences can be utilised.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred tax assets and liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

#### 1.14 Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost.

Interest costs are charged against income without restriction. No borrowing costs have been capitalised.

#### 1.15 Leases

The Company recognises lease liabilities in relation to leases within 'accruals and deferred income'. The lease liability is measured at the present value of the remaining lease payments, discounted at the Company's incremental borrowing rate. The weighted average lessee's incremental borrowing rate applied to the lease liabilities on 31 December 2023 was 4.6% (2022 : 6.35%). The associated ROU assets are recognised and included within 'plant and equipment' and are measured at the amount equal to the lease liability.

The Company applies the following practical expedients:

- a single discount rate is applied to a portfolio of leases with reasonable similar characteristics;

- an assessment is performed on whether leases are onerous; and

- hindsight is used in determining the lease term where the contract contains options to extend or terminate the lease.

Lease payments are allocated between the liability and finance cost. The finance cost is charged to profit or loss over the lease term.

The ROU asset is depreciated over the shorter of the ROU asset's useful economic life and the lease term on a straight-line basis. The leases with a remaining lease term of less than 12

months are accounted as short-term operating leases. Payments made under operating leases (net of any incentives received from the lessor) were charged to profit or loss on a straight-line basis over the period of the lease.

#### 1.16 Insurance contracts

#### **Definition and classification**

The Company issues contracts that transfer significant insurance risk and that are classified as insurance contracts. As a general guideline, the Company defines as significant insurance risk the possibility of having to compensate the policyholder if a specified uncertain future event (the insured event) adversely affects the policyholder on a present value basis. The Company issues nonlife insurance to individuals and businesses.

In the normal course of business, the Company uses reinsurance to mitigate its risk exposures. A reinsurance contracts transfers significant insurance risk if is transfers substantially all of the insurance risk resulting from the insures portion of the underlying insurance contract, even if it does not expose the reinsurer to the possibility of a significant loss.

#### Separating components from insurance contracts

The Company assesses its non-life insurance products to determine whether they contain distinct components which must be accounted for under another IFRS instead of under IFRS 17. After separating any distinct components, the Company applies IFRS 17 to all remaining components of the (host) insurance contract. Currently, the Company's products do not include any distinct components that require separation.

#### Unit of account

#### Level of aggregation

IFRS 17 requires a company to determine the level of aggregation for applying its requirements. The level of aggregation for the Company is determined firstly by dividing the business written into portfolios. Portfolios comprise groups of contracts with similar risks which are managed together. Portfolios are further divided based on expected profitability at inception into three categories: onerous contracts, contracts with no significant risk of becoming onerous, and the remainder. This means that, for determining the level of aggregation, the Company identifies a contract as the smallest 'unit', i.e., the lowest common denominator. However, the Company makes an evaluation of whether a series of contracts need to be treated together as one unit based on reasonable and supportable information, or whether a single contract contains components that need to be separated and treated as if they were stand-alone contracts. As such, what is treated as a contract for accounting purposes may differ from what is considered as a contract for other purposes (i.e., legal or management). IFRS 17 also requires that no group for level of aggregation purposes may contain contracts issued more than one year apart.

The Company applied a full retrospective approach for transition to IFRS 17. The portfolios are further divided by year of issue and profitability for recognition and measurement purposes. Hence, within each year of issue, portfolios of contracts are divided into three groups, as follows:

- A group of contracts that are onerous at initial recognition (if any)
- A group of contracts that, at initial recognition, have no significant possibility of becoming onerous subsequently (if any)
  - A group of the remaining contracts in the portfolio (if any)

The profitability of groups of contracts is assessed by using historical data already available to the Company since the Company'sinsurance contracts issued are eligible to be measured under the PAA.. The Company assumes that no contracts in the portfolio are onerous at initial recognition unless facts and circumstances indicate otherwise. For contracts that are not onerous, the Company assesses, at initial recognition, that there is no significant possibility of becoming onerous subsequently by assessing the likelihood of changes in applicable facts and circumstances. The Company considers facts and circumstances to identify whether a group of contracts are onerous based on:

- Pricing information
- Results of similar contracts it has recognised

• Environmental factors, e.g., a change in market experience or regulations

The Company divides portfolios of reinsurance contracts held applying the same principles set out above, except that the references to onerous contracts refer to contracts on which there is a net gain on initial recognition. For some groups of reinsurance contracts held, a group can comprise a single contract.

#### **Recognition and derecognition**

The Company recognises groups of insurance contracts it issues from the earliest of the following:

• The beginning of the coverage period of the group of contracts;

• The date when the first payment from a policyholder in the group is due or when the first payment is received if there is no due date;

• For a group of onerous contracts, if facts and circumstances indicate that the group is onerous

The Company recognises a group of reinsurance contracts held it has entered into from the earlier of the following:

• The beginning of the coverage period of the group of reinsurance contracts held. However, the Company delays the recognition of a group of reinsurance contracts held that provide proportionate coverage until the date any underlying insurance contract is initially recognised.

• The date the Company recognises an onerous group of underlying insurance contracts if the Company entered into the related reinsurance contract held in the group of reinsurance contracts held at or before that date.

The Company adds new contracts to the group in the reporting period in which that contract meets one of the criteria set out above.

#### Accounting for contract modifications and derecognition

An insurance contract is derecognised when it is:

extinguished (that is, when the obligation specified in the

insurance contract expires or is discharged or cancelled); orthe contract is modified and additional criteria discussed below are met.

When an insurance contract is modified by the Company as a result of an agreement with the counterparties or due to a change in regulations, the Company treats changes in cash flows caused by the modification as changes in estimates of the Fulfilment Cash Flows ('FCF'), unless the conditions for the derecognition of the original contract are met. The Company derecognises the original contract and recognises the modified contract as a new contract if any of the following conditions are present:

• if the modified terms had been included at contract inception and the Company would have concluded that the modified contract:

- i. is not within the scope of IFRS 17;
- ii. results in different separable components;
- iii. results in a different contract boundary; or
- iv. belongs to a different group of contracts;

• the original contract represents an insurance contract with direct participation features, but the modified contract no longer meets that definition, or vice versa; or

• the original contract was accounted for under the PAA, but the modification means that the contract no longer meets the eligibility criteria for that approach.

When a new contract is required to be recognised as a result of modification and it is within the scope of IFRS 17, the new contract is recognised from the date of modification and is assessed for, amongst other things, contract classification. When a modification is not treated as a derecognition, the Company recognises amounts paid or received for the modification with the contract as an adjustment to the relevant liability for remaining coverage.

#### Measurement

#### Fulfilment cash flows within contract boundary

The FCF are the current estimates of the future cash flows within the contract boundary of a group of contracts that the Company expects to collect from premiums and pay out for claims, benefits and expenses, adjusted to reflect the timing and the uncertainty of those amounts.

The estimates of future cash flows:

a. are based on a probability-weighted mean of the full range of possible outcomes;

b. are determined from the perspective of the Company, provided that the estimates are consistent with observable market prices for market variables; and

c. reflect conditions existing at the measurement date.

An explicit risk adjustment for non-financial risk is estimated separately from the other estimates. Unless the contracts are onerous, the explicit risk adjustment for non-financial risk is only estimated for the measurement of the Liability for Incurred Claims ('LIC').

The estimates of future cash flows are adjusted using the

current discount rates to reflect the time value of money and the financial risks related to those cash flows, to the extent not included in the estimates of cash flows. The discount rates reflect the characteristics of the cash flows arising from the groups of insurance contracts, including timing, currency and liquidity of cash flows. The determination of the discount rate that reflects the characteristics of the cash flows and liquidity characteristics of the insurance contracts requires significant judgement and estimation, as discussed further below and oin note 2.

In the measurement of reinsurance contracts held, the probability-weighted estimates of the present value of future cash flows include the potential credit losses and other disputes of the reinsurer to reflect the non-performance risk of the reinsurer. The Company uses consistent assumptions to measure the estimates of the present value of future cash flows for the groups of reinsurance contracts held and such estimates for the groups of underlying insurance contracts.

#### Contract boundary

The Group uses the concept of contract boundary to determine what cash flows should be considered in the measurement of groups of insurance contracts.

Cash flows are within the boundary of an insurance contract issued if they arise from the rights and obligations that exist during the period in which the policyholder is obligated to pay premiums or the Company has a substantive obligation to provide the policyholder with insurance contract services.

#### A substantive obligation ends when:

a. the Company has the practical ability to reprice the risks of the particular policyholder or change the level of benefits so that the price fully reflects those risks; or

b. both of the following criteria are satisfied:

i. the Company has the practical ability to reprice the contract or a portfolio of contracts so that the price fully reflects the reassessed risk of that portfolio; and

ii. the pricing of premiums up to the date when risks are reassessed does not reflect the risks related to periods beyond the reassessment date.

Cash flows outside the insurance contracts boundary relate to future insurance contracts and are recognised when those contracts meet the recognition criteria.

For groups of reinsurance contracts held, cash flows are within the contract boundary if they arise from substantive rights and obligations of the Company that exist during the reporting period in which the Company is compelled to pay amounts to the reinsurer or in which the Company has a substantive right to receive insurance contract services from the reinsurer.

The Company reinsurance agreements held which are risksattaching include all estimates of future cash flows arising from all underlying contracts issued and expected to be issued within the reinsurance contracts' boundary and are included in the measurement of the reinsurance contracts. Conversely, the Company's reinsurance agreements held which are on a lossoccurring basis provide coverage for claims incurred during an accident year. Thus, all cash flows arising from claims incurred and expected to be incurred in the accident year are included in the measurement of the reinsurance contracts held.

Cash flows that are not directly attributable to a portfolio of insurance contracts, such as some product development and training costs, are recognised in other operating expenses as incurred.

#### Insurance acquisition cash flows

Insurance acquisition cash flows arise from the costs of selling, underwriting and starting a group of insurance contracts (issued or expected to be issued) that are directly attributable to the portfolio of insurance contracts to which the group belongs.

The Company uses a systematic and rational method to allocate:

a) Insurance acquisition cash flows that are directly attributable to a group of insurance contracts to that group; and

b) Insurance acquisition cash flows directly attributable to a portfolio of insurance contracts that are not directly attributable to a group of contracts, to groups in the portfolio.

#### Risk adjustment for non-financial risk

The risk adjustment for non-financial risk is applied to the present value of the estimated future cash flows, and it reflects the compensation that the Company requires for bearing the uncertainty about the amount and timing of the cash flows from non-financial risk as the Company fulfils insurance contracts. For reinsurance contracts held, the risk adjustment for non-financial risk represents the amount of risk being transferred by the Company to the reinsurer. Methods and assumptions used to determine the risk adjustment for non-financial risk are discussed in note 2.

Initial and subsequent measurement – Groups of contracts measured under the PAA

The Company applies the PAA to all the insurance contracts that it issues and reinsurance contracts that it holds, as:

• The coverage period of each contract in the group is one year or less, including insurance contract services arising from all premiums within the contract boundary;

• For contracts longer than one year, the Company has modelled possible future scenarios and reasonably expects that the measurement of the liability for remaining coverage for the group containing those contracts under the PAA does not differ materially from the measurement that would be produced applying the general model. In assessing materiality, the Company has also considered qualitative factors such as the nature of the risk and types of its lines of business.

The Company does not apply the PAA if, at the inception of the group of contracts, it expects significant variability in the fulfilment cash flows that would affect the measurement of the liability for the remaining coverage during the period before a claim is incurred. Variability in the fulfilment cash flows increases with the length of the coverage period of the group of contracts.

For a group of contracts that is not onerous at initial recognition, the Company measures the liability for remaining coverage as the portion of the premiums received less any acquisition cash flows paid. The Company measures the carrying amount of the liability for remaining coverage at the end of each reporting period as the liability for remaining coverage at the beginning of the period plus premium received less any insurance acquisition cash flows paid in the period minus the amount recognised as insurance revenue for the services provided in the period. When a group of insurance contracts has premium receivables that relate to past service, such cash flows have been recognised as part of the liability for remaining coverage.

Where facts and circumstances indicate that contracts are onerous at initial recognition, the Company performs additional analysis to determine if a net outflow is expected from the contract. Such onerous contracts are separately grouped from other contracts and the Company recognises a loss in profit or loss for the net outflow, resulting in the carrying amount of the liability for the group being equal to the fulfilment cash flows. A loss component is established by the Company for the liability for remaining coverage for such onerous group depicting the losses recognised.

The Company measures its reinsurance contract assets for a group of reinsurance contracts that it holds on the same basis as insurance contracts that it issues. However, they are adapted to reflect the features of reinsurance contracts held that differ from insurance contracts issued, for example the generation of expenses or reduction in expenses rather than revenue. In the measurement of reinsurance contracts held, the probabilityweighted estimates of the present value of future cash flows include the potential credit losses and other disputes of the reinsurer to reflect the non-performance risk of the reinsurer.

Where the Company recognises a loss on initial recognition of an onerous group of underlying insurance contracts or when further onerous underlying insurance contracts are added to a group, the Company establishes a loss-recovery component of the asset for remaining coverage for a group of reinsurance contracts held depicting the recovery of losses.

The Company calculates the loss-recovery component by multiplying the loss recognised on the underlying insurance contracts and the percentage of claims on the underlying insurance contracts the Company expects to recover from the group of reinsurance contracts held. The Company uses a systematic and rational method to determine the portion of losses recognised on the group of insurance contracts covered by the group of reinsurance contracts held where some contracts in the underlying group are not covered by the group of reinsurance contracts held.

Where the Company has established a loss-recovery component, the Company subsequently reduces the loss recovery component to zero in line with reductions in the onerous group of underlying insurance contracts in order to reflect that the loss-recovery component shall not exceed the portion of the carrying amount of the loss component of the onerous group of underlying insurance contracts that the entity expects to recover from the group of reinsurance contracts held.

The loss-recovery component adjusts the carrying amount of the asset for remaining coverage.

Some reinsurance contracts held contain profit commission arrangements. Under these arrangements, there is a minimum guaranteed amount that the Company will always receive - either in the form of profit commission, or as claims, or another contractual payment irrespective of the insured event happening. The minimum guaranteed amounts have been assessed to be highly interrelated with the insurance component of the reinsurance contacts and are, therefore not accounted for separately.

The Company estimates the liability for incurred claims as the fulfilment cash flows related to incurred claims. The fulfilment cash flows incorporate, in an unbiased way, all reasonable and supportable information available without undue cost or effort about the amount, timing and uncertainty of those future cash flows, they reflect current estimates from the perspective of the Company and include an explicit adjustment for non-financial risk (the risk adjustment). If there is no significant financing component and if claims settlement is expected within a year of the occurrence of loss, no discounting is required. The Company currently does not apply this option. In order to provide for maximum transparency and comparability in measuring our business, the Company consistently considers the time value of money when using the PAA. Under the PAA, changes to the financial inputs for the liability for incurred claims compared to the ones used at initial recognition of the liability for incurred claims are presented in Finance income / expense from re/ insurance contacts.

Where, during the coverage period, facts and circumstances indicate that a group of insurance contracts is onerous, the Company recognises a loss in profit or loss for the net outflow, resulting in the carrying amount of the liability for the group being equal to the fulfilment cash flows. A loss component is established by the Company for the liability for remaining coverage for such onerous group depicting the losses recognised.

## Amounts recognised in the statement of profit or loss and other comprehensive income

Insurance service result from insurance contracts issued

#### Insurance revenue

As the Company provides insurance contract services under the group of insurance contracts, it reduces the LRC and recognises insurance revenue. The amount of insurance revenue recognised in the reporting period depicts the transfer of promised services at an amount that reflects the portion of consideration that the Company expects to be entitled to in exchange for those services. The insurance revenue for the period is the amount of expected premium receipts allocated to the period. The Company allocates the expected premium receipts to each period of insurance contract services on the basis of the passage of time.

#### Insurance service expense

Insurance service expenses include the following:

a. incurred claims and benefits, excluding investment components;

- b. other incurred directly attributable expenses;
- c. insurance acquisition cash flows amortisation;
- d. changes to liabilities for incurred claims; and
- e. onerous contract losses or reversals of those losses.

For contracts measured under the PAA, amortisation of insurance

acquisition cash flows is based on the passage of time.

Other expenses that do not meet the above criteria are included as other operating expenses in the statement of profit or loss and other comprehensive income.

Insurance service result from reinsurance contracts held

#### Net income or expense from reinsurance contracts held

The Company presents separately on the face of the statement of profit or loss and other comprehensive income, the amounts expected to be recovered from reinsurers (reinsurance income), and an allocation of the reinsurance premiums paid (reinsurance expenses). The Company treats reinsurance cash flows that are contingent on claims on the underlying contracts as part of the claims that are expected to be reimbursed under the reinsurance contract held and excludes investment components and commissions from an allocation of reinsurance premiums presented on the face of the statement of profit or loss and other comprehensive income.

#### Insurance finance income and expense

Insurance finance income or expenses comprise the change in the carrying amount of the group of insurance contracts arising from the effect of the time value of money and changes in the time value of money and the effect of financial risk and changes in financial risk. The Company does not disaggregate finance income and expenses because the related financial assets are managed on a fair value basis and measured at FVTPL.

## 2. Critical accounting estimates and judgments in applying accounting policies

Estimates and judgments are continually evaluated and based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In the opinion of the Directors, the accounting estimates and judgements made in the course of preparing these financial statements are not difficult, subjective or complex to a degree which would warrant their description as critical in terms of the requirements of IAS 1, other than the estimate of the liability for incurred claims made under insurance contracts.

#### Significant judgments and estimates in applying IFRS 17

The Company applies the PAA to simplify the measurement of insurance contracts. When measuring liabilities for remaining coverage, the PAA is broadly similar to the Company's previous accounting treatment under IFRS 4. However, when measuring liabilities for incurred claims, the Company now discounts cash flows that are expected to occur more than one year after the date on which the claims are incurred and includes an explicit risk adjustment for non-financial risk.

There are several sources of uncertainty that need to be considered in the estimate of liabilities that the Company will ultimately pay for insurance claims. In particular, insurance risks including exposure to liability can span over more than one accounting year, and this increases the uncertainty surrounding the estimate for final settlement. The Company applies conventional statistical models in order to determine the ultimate liability of incurred claims as further described in Note 3.1. The Directors believe that the liability arising from incurred claims under insurance contracts is adequately reserved as at the financial year end. Further detail is provided in Note 15 to these financial statements.

#### Discount rates

Insurance contract liabilities are calculated by discounting expected future cash flows at a risk free rate, plus an illiquidity premium where applicable. Risk free rates are determined by reference to the risk-free rate as issued by the European Insurance and Occupational Pensions Authority ("EIOPA") as at the end of each reporting period. The illiquidity premium is determined by reference to observable market rates, if deemed material.

The yield curves used to discount the estimates for future cash flows that do not vary based on the returns of the underlying items are as follows:

| Insurance contracts issued<br>and reinsurance contracts held | 1 year | 5 years | 10 years |
|--|--------|---------|----------|
| 2022   | 3.2%   | 3.1%    | 3.1%     |
| 2023   | 3.4%   | 2.3%    | 2.4%     |

Risk adjustment for non-financial risk

The risk adjustment for non-financial risk is the compensation that the Company requires for bearing the uncertainty about the amount and timing of the cash flows of groups of insurance contracts. The risk adjustment reflects an amount that an insurer would rationally pay to remove the uncertainty that future cash flows will exceed the expected value amount.

The non-financial risk adjustment has been estimated using a confidence-interval-based approach, using Value at Risk (VaR) metrics for the probability distribution of the current value of future cash flows, and calibrating the target percentile confidence interval to 75 percentile. The Group estimates an adjustment for non-financial risk separately from all other estimates.

#### 3. Management of insurance and financial risk

The Company issues contracts that transfer insurance risk. The Company is also exposed to financial risk. This section summarises these risks and the way the Company manages them.

#### 3.1 Insurance risk

The risk under any one insurance contract is the possibility that the insured event occurs and the uncertainty of the amount of the resulting claim. By the very nature of an insurance contract, this risk is random and therefore unpredictable. The terms and conditions of the contracts set out the bases for the determination of the Company's liability should the insured event occur. The risks underwritten include accident, motor (including third party liability), marine and transport, fire and other damage to property, engineering, and liability.

For a portfolio of insurance contracts where the theory of

probability is applied to pricing and provisioning, the principal risk that the Company faces under its insurance contracts is that the actual claims and benefit payments exceed the carrying amount of the insurance liabilities. This could occur because the frequency or severity of claims is greater than estimated. Insurance events are random and the actual number and amount will vary from year to year from the estimate established using statistical techniques.

Experience shows that the larger the portfolio of similar insurance contracts, the smaller variability about the expected outcome will be. In addition, a more diversified portfolio is less likely to be affected across the board by a change in any subset of the portfolio. The Company has developed its insurance underwriting strategy to diversify the type of insurance risks accepted and within each category of business to achieve a sufficiently large population of risks to reduce the variability of the expected outcome.

Factors that aggravate insurance risks include the lack of risk diversification in terms of type and amount of risk, geographical location and type of industry covered

#### Frequency and severity of claims

The frequency and severity of claims can be affected by several factors including increasing levels of court awards and the risks of a single event that can affect a number of individual risks insured by the Company, such as flood or an earthquake.

The Company manages these risks through its underwriting strategy, adequate reinsurance arrangements and proactive claims handling.

#### Underwriting risk

The Directors manage exposure to insurance risk through an Underwriting Committee (U.C.) that considers aggregation of risk and establishes risk retention levels.

The underwriting strategy attempts to ensure that the risks underwritten are well diversified in terms of type and amount of risk and industry. Disciplined underwriting, encompassing risk assessment, risk management, pricing and exposure control is critical to the Company's success.

The goal is for underwriters to be in a position to:

- Understand and assess each risk,
- Make appropriate decisions within their area of competence and authority limits,
- Differentiate between risks,
- Apply suitable terms and conditions in order to manage the portfolio,
- Control exposure,

- Improve the predictability of the loss experience and make appropriate use of the Company's technical capacity.

Each of the Company's underwriters has a specific license that sets clear parameters for the business that they can underwrite, based on the competence of the individual underwriter. The U.C. looks at Company underwriting issues, reviewing and agreeing underwriting direction and setting policy and directives where appropriate, and limits on the overall retention of risk that the Company carries. The Company's management of the underwriting and claims risks restricts underwriting of specific high risk classes of business to underwriters with appropriate technical competence and includes reviewing the performance and management of selected individual insurance portfolios throughout the Company.

Pricing is generally based upon historical claims frequencies and claims severity averages, adjusted for inflation and trended forward. While claims remain the Company's principal cost, allowance is also made in the pricing procedures for acquisition expenses, administration expenses, investment income, the cost of reinsurance, and for a profit loading that adequately covers the cost of the capital exposed to risk.

The Company has the right not to renew individual policies or to reprice on renewal, it can impose deductibles and it has the right to reject the payment of a fraudulent claim.

Reinsurance arrangements are in place as further described below.

#### Reinsurance risk

The Company reinsures a portion of the risks underwritten to control exposure to losses, to reduce volatility, and to protect capital. The types of reinsurance cover, and the level of retention, are based on the Company's internal risk management assessment, which takes into account the risk being covered and the sums assured. The reinsurance strategy and programme are set and agreed by the Reinsurance Committee on an annual basis. The reinsurance arrangements include a mix of proportional, facultative and non-proportional cover, which limit the liability of the Company to any one individual claim or event. Furthermore, the international health business is covered by a reinsurance agreement whereby it transfers all the risk back to the reinsurers.

Monthly reviews of aggregates are carried out to ensure that adequate reinsurance is in place.

Periodical meetings are held with the Company's reinsurance brokers, the purpose of which is to systematically agree the renewal process of the Company's reinsurance requirements, and to ensure a formalised means of communication between Elmo and its reinsurance brokers. Good "ad hoc" contact with reinsurance brokers is maintained during the year when dealing with risks that are not catered for by standard reinsurance treaties.

The Company monitors the financial condition of reinsurers on an ongoing basis, and reviews its reinsurance arrangements regularly to ensure that its counterparty exposure to individual reinsurance groups is within the parameters set by the U.C., and the Malta Financial Services Authority. The Company does not place reinsurance with reinsurers having a credit rating lower than 'A-'.

#### Concentration of insurance risk

All risks underwritten by the Company are based in Malta. The Directors consider that the insurance portfolio is not unduly concentrated, also taking into account the nature and extent of reinsurance protection acquired by the Company.

#### Claims handling

Risks surrounding known claims are mitigated through the Company's inhouse teams of skilled claims technicians who apply their experience and knowledge to the circumstances of individual claims. These teams are responsible for investigating and adjusting claims, together with specialist independent loss adjustors that might be engaged depending on exigencies. Claim estimates are reviewed periodically and adjusted on the basis of information that becomes available specific to the claim as well as changes in external factors such as judicial decisions and legislation. The Company generally pursues early settlement of claims to reduce its exposure to unpredictable

#### Sources of uncertainty in the estimation of future claim payments

Claims on contracts are accounted for on a claims-occurrence basis. The Company is liable for all insured events that occurred during the term of the contract, even if the loss is discovered after the end of the contract term. As a result, the estimation of claims incurred but not reported ('IBNR') is generally subject to a greater degree of uncertainty than the estimation of the cost of settling claims already notified to the Company. Certain classes of business can take several years to develop, in particular claims involving casualty, and are therefore subject to a greater degree of uncertainty than other classes of business which are typically settled in a shorter period of time.

The estimated cost of claims includes direct expenses to be incurred in settling claims, net of the expected subrogation value and recoveries. The Company takes all reasonable steps to ensure that it has appropriate information regarding its claims exposures. However, given the uncertainty in establishing claims provisions, it is possible that the final outcome will prove to be different from the original liability established. The liability for these contracts comprises a provision for IBNR and a provision for reported claims not yet paid at the balance sheet date (see Note 15).

In calculating the estimated cost of unpaid claims, the Company uses a combination of estimation techniques, based partly on known information and partly on statistical analyses of a historical experience. Reserves are analysed by line of business. Case reserves are established on each individual claim and are adjusted as new information becomes known during the course of handling the claim. Lines of business for which claims data (e.g. paid claims and case reserves) emerge over a long period of time are referred to as long tail lines of business.

Lines of business for which claims data emerge more quickly are referred to as short tail lines of business. Risks underwritten by the Company are typically short tail, although certain lines of business may take longer to develop, including, for example, personal accident and employers' liability.

The Company's claims managers regularly review reserves for both current and prior accident years using the most recent claims data. These reserve reviews incorporate a variety of judgments, and involve extensive analysis. The ultimate cost of outstanding claims, including claims incurred but not reported, is subsequently estimated through statistical analyses of historical claims trends, which are projected forward giving greater weighting to recent years. Additional qualitative judgment is applied to assess the extent to which past trends may not apply

#### in the future.

Note 15 presents the development of the estimate of ultimate claim cost for claims notified in a given year. This gives an indication of the accuracy of the Company's estimation techniques for claims payable.

#### Sensitivity analysis to underwriting risk variables

The following tables present information on how reasonably possible changes in assumptions made by the Company with regard to underwriting risk variables impact product line insurance liabilities and profit or loss and equity before and after risk mitigation by reinsurance contracts held. The analysis is based on a 5% upwards and downwards change in the ultimate loss amount while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions might be correlated.

|  | Impact on Profit and<br>Loss before tax |            | Equity    |             |
|--|---|------------|-----------|-------------|
|  | Increase                                | Decrease   | Increase  | Decrease    |
|  | €                                       | €          | €         | €           |
| At 31 December<br>2023<br>Insurance contract<br>liabilities<br>Insurance and | 1,664,929 (                             | 1,664,929) | 1,082,204 | (1,082,204) |
| reinsurance  | 1,321,503 (                             | 1,321,503) | 858,977   | (858,977)   |
| contract held (net) At 31 December   |   |            |           |             |

| 2022 (restated)<br>Insurance contract<br>liabilities<br>Insurance and | 1,509,351 (1,509,351) | 981,078 | (981,078) |
|---|-----------------------|---------|-----------|
| reinsurance<br>contract held (net)                                    | 1,057,522 (1,057,522) | 687,389 | 687,389   |

#### 3.2 Financial risk

The Company is exposed to financial risk through its financial assets, financial liabilities, and insurance and reinsurance assets and liabilities. The key financial risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from its insurance risk. The most important components of this financial risk are the interest rate risk, equity price risk, currency risk, credit risk and liquidity risk. These risks arise from open positions in interest rate, currency and equity products, all of which are exposed to general and specific market movements. The risk management policies employed by the Company to manage these risks are discussed below.

#### Market risk

#### (a) Interest rate risk

In general, the Company is exposed to risk associated with the effects of fluctuations in the prevailing levels of market interest rates. Assets issued at variable rates expose the Company to cash flow interest rate risk. Assets issued at fixed rates expose the Company to fair value interest rate risk. Fair value interest rate risk is the risk that the relative value of a security will worsen due to an interest rate increase. Interest rate risk is mitigated through

the distribution of fixed interest investments over a range of maturity dates. The exposure to interest rate risk in respect of borrowings is not material considering the short-term nature of the Company's external borrowings. Notes 14, 11.5 and 22 incorporate interest rate and maturity information with respect to the Company's assets and liabilities.

The total assets and liabilities subject to interest rate risk are as follows:

|   | 2023<br>€  | 2022<br>€  |
|---|------------|------------|
| Financial assets at floating interest rates | 7,170,435  | 9,835,507  |
| Reinsurance contract assets                 | 3,782,941  | 6,224,378  |
| Financial assets at fixed<br>interest rates | 8,587,252  | 6,114,011  |
|   | 19,540,628 | 22,173,896 |
| Insurance contract liabilities              | 18,535,339 | 20,876,485 |
| Financial liabilities at fixed              | 662,997    | 138,468    |
| interest rates                              | 19,198,336 | 21,014,953 |

Interest rate risk is principally managed through the investment in debt securities having a wide range of maturity dates. Moreover, investment parameters exist to limit exposure to any one issuer and any one particular security. Note 14 incorporates maturity information with respect to the Company's assets. The exposure to interest rate risk in respect of borrowings is not considered to be significant.

Up to the balance sheet date the Company did not have any hedging policy with respect to interest rate risk as exposure to such risks was not deemed to be significant by the Directors.

#### Sensitivity analysis - interest rate risk

The sensitivity analysis for interest rate risk illustrates how changes in the future cash flows or fair value of a financial instrument will fluctuate because of changes in market interest rates at the reporting date.

The following analysis is performed for reasonably possible movements in key variables with all other variables held constant, showing the impact on profit and loss before tax and equity, showing an increase and a decrease of 150 basis points (2022: 100 basis points). The correlation of variables will have a significant effect in determining the ultimate impact of interest rate risk fluctuations, but to demonstrate the impact due to changes in variables, variables have been changes on an individual basis. It should be noted that movements in these variables are non-linear.

|   |                      | n Profit and<br>efore tax | Equity               |                      |  |
|---|----------------------|---------------------------|----------------------|----------------------|--|
|   | Increase             | Decrease                  | Increase             | Decrease             |  |
|   | €                    | €                         | €                    | €                    |  |
| At 31 December<br>2023<br>Insurance and                           |                      |                           |                      |                      |  |
| reinsurance<br>contract held (net)                                | 420,116              | (447,184)                 | 273,075              | (290,670)            |  |
| Financial assets<br>and liabilities (net)                         | (434,742)            | 485,227                   | (282,582)            | 315,398              |  |
|   | (14,626)             | 38,043                    | (9,507)              | 24,728               |  |
| At 31 December<br>2022 (restated)<br>Insurance and<br>reinsurance | 170 504              | (100 205)                 | 114 049              | (119.550)            |  |
| contract held (net)<br>Financial assets<br>and liabilities (net)  | 178,536<br>(233,602) | (182,385)<br>248,941      | 116,048<br>(151,841) | (118,550)<br>161,812 |  |
| and natificities (net)  | (55,066)             | 66,556                    | (35,793)             | 43,262               |  |

The fair value interest rate risk arising on financial assets, specifically debt securities, which carry a fixed interest rate risk is not deemed to be material, after also considering that such amounts are accounted for as fair value through profit or loss.

#### (b) Price risk

The Company's financial assets are also susceptible to the risk of changes in value due to changes in the prices of equities in respect of investments held and classified on the balance sheet as fair value through profit or loss. The Directors manage this risk of price volatility by entering into a diverse range of investments including equities and collective investment schemes. The Company has an active Investment Committee that has established a set of investment guidelines that is also approved by the Board of Directors. These guidelines provide parameters for investment management, including contracts with external portfolio managers. The Directors review market value fluctuations arising on the Company's investments on a regular basis. Investment parameters and diversification procedures also consider solvency restrictions imposed by the relevant Insurance Regulations.

The total assets subject to equity price risk are as follows:

|  | 2023       | 2022       |
|--|------------|------------|
|  | €          | €          |
| Assets subject to equity price risk<br>(Note 14) | 21,965,954 | 16,581,726 |

Sensitivity analysis - equity price risk

The sensitivity for equity price risk illustrates how changes in the fair value of equity securities will fluctuate because of changes in market prices, whether those changes are caused by factors specific to the individual equity issuer, or factors affecting all similar equity traded in the market. The sensitivity for equity price risk is based on global equity returns, assuming that currency exposures are hedged.

Given the investment strategy and asset mix of the Company, a 15% (2022: 17.5%) positive or negative movement in equity

prices is considered to be an appropriate benchmark for sensitivity purposes.

An increase and a decrease of 15% (2022: 17.5%) in equity prices, with all other variables held constant, would result in an impact on the pre-tax profit for the year of  $\in$  3,294,893 (2022:  $\notin$ 2,901,802).

#### (c) Currency risk

Currency risk arises from the possibility that fluctuations in foreign exchange rates will impact on the amounts that are paid to settle liabilities and on the amounts that are realised from the Company's assets. Most of the Company's liabilities are in local currency and are therefore not subject to currency risk. The Company's exposure to foreign exchange risk arises primarily from investments that are denominated in currencies other than the euro.

The Company's Investment Committee establishes allowable thresholds with regards to the Company's exposure to foreign exchange risk. Currency exposure is also regulated by the Regulations underlying the Maltese Insurance Business Act, 1998.

As at 31 December 2023, the Company's exposure to foreign currency investments, principally represented a mix of USD and GBP, amounted to €11,114,487 (2022: €7,903,314). The Company's exposure to foreign currency as at 31 December 2023, mainly arose in respect to USD and GBP. The strengthening or weakening of the functional currency by 10% (2022: 12.5%) against the other currencies with all other variables held constant, would result in an impact on pre-tax profit for the year of €1,111,449 (2022: €987,914).

#### (d) Credit risk

Credit risk is the risk that a counterparty will be unable to pay amounts in full when due. Key areas where the Company is exposed to credit risk are:

- Financial assets and cash and cash equivalents;
- Reinsurance contract assets;
- Insurance and reinsurance contract liabilities

The Company places limits on the level of credit risk undertaken from the main categories of financial instruments. These limits also take due consideration of the solvency restrictions imposed by the relevant Regulations. The investment strategy of the Company considers the credit standing of the counterparty and control structures are in place to assess and monitor these risk thresholds.

The Company structures the levels of credit risk it accepts by limiting as far as possible its exposure to a single counterparty or groups of counterparty. Limits on the level of credit risk are approved by the Directors, and the credit terms allowed depend on the distribution channel through which business is secured. Frequent meetings are held, attended by Directors, in order to monitor the overall credit situation, and to take remedial measures as appropriate. The Directors consider that the Company is not exposed to material concentration of credit to single counterparty. The Directors, and the credit terms allowed depend on the distribution channel through which business is secured. Frequent meetings are held, attended by Directors, in order to monitor the overall credit situation, and to take remedial measures as appropriate. The Directors consider that the Company is not exposed to material concentration of credit to single counterparty.

Reinsurance is used to manage insurance risk. This does not, however, discharge the Company's liability as primary insurer. If a reinsurer fails to pay a claim for any reason, the Company remains liable for the payment to the policyholder. The creditworthiness of reinsurers is monitored on an annual basis by reviewing their financial strength prior to finalisation of any contract. The Company's policy is to only contract reinsurers with a minimum rating of A-.

The Company is also exposed to credit risk for its cash and cash equivalents and financial assets. The Company's cash is placed with quality financial institutions.

Assets bearing credit risk at the balance sheet date are analysed as follows:

|  | As at 31 December 2023 |           |           |            |            |
|--|------------------------|-----------|-----------|------------|------------|

| Other receivables                                      | -                      | -         | -         | 609,787    | 609,787    |
| Cash flows arising from insurance contract liabilities | -                      | -         | -         | 5,560,761  | 5,560,761  |
| Allowance for ECL                                      | -                      | -         | -         | (200,272)  | (200,272)  |
| Cash and cash equivalents                              | -                      | 325,323   | 1,926,543 | 7,055,408  | 9,307,274  |
|  |                        | 325,323   | 1,988,595 | 13,025,684 | 15,339,602 |
| Cash flows arising from reinsurance contract assets    | 5,547,809              | 1,056,543 | -         | -          | 6,604,352  |
| Total assets bearing credit risk                       | 5,719,177              | 2,019,918 | 3,486,925 | 17,305,560 | 28,531,580 |

In line with the requirements of IFRS 17, receivables from insurance contracts issued are disclosed above as 'Cash flows arising from insurance contract liabilities' and form part of the liability for remaining coverage within insurance contract liabilities.

#### (e) Liquidity risk

The Company's exposure to liquidity risk arises from the eventuality that the frequency or severity of claims are greater than estimated. Liquidity risk is the risk that cash may not be available to pay obligations when due at a reasonable cost.

The Directors do not consider this risk to be significant given the nature of the Company's financial assets and liabilities. The Company's financial assets are considered to be readily realisable as they consist of local and foreign securities listed on recognised stock markets. Moreover, the Company ensures that a reasonable level of funds is available at any point in time for unexpected large claims and the Company may also resort to overdraft facilities which provide a short-term means of finance.

The table below analyses the Company's financial liabilities into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts disclosed in the table are the expected timing cash flows arising from the Company's liabilities.

The current and non-current split of insurance contracts liabilities and assets and reinsurance contracts assets and liabilities broadly aligns to the above analyses, other than cash inflows arising from the respective contacts which are all within one year.

Expected undiscounted cash outflows

#### 3.3 Capital risk management

The Company's objectives when managing capital are:

• to comply with the insurance capital requirements required by the Maltese insurance regulator ("MFSA");

• to safeguard the Company's ability to continue as a going concern so that it can continue to provide returns for shareholders and benefits for other stakeholders; and,

• to provide an adequate return to shareholders by pricing insurance contracts commensurately with the level of risk.

In order to maintain or adjust the capital structure, the Company may issue new shares or capitalise contributions received from its shareholders.

The Company is required to hold regulatory capital for its general insurance business in compliance with the rules issued by the Malta Financial Services Authority (MFSA). The minimum capital requirement must be maintained at all times throughout the year. The Company monitors its capital level on a regular basis, by ensuring that sufficient assets are maintained to match insurance liabilities and to provide solvency cover. Any transactions that may potentially affect the Company's solvency position are immediately reported to the Directors and shareholders for resolution prior to notifying the MFSA.

As from 1 January 2016, the Company was subject to the requirements of the EU Solvency II directive. The Solvency II regime establishes a new set of EU wide capital requirements, risk management and disclosure standards. The Company must hold eligible own funds to cover the solvency capital requirement (SCR) and eligible basic own funds to cover the minimum capital requirement (MCR). The SCR shall be calculated either in accordance with the standard formula or using a full or partial internal model (PIM) as approved by the Regulator. The Company must immediately inform the Regulator where it observes that its SCR or MCR are no longer complied with or where there is risk of non-compliance in the following six months for SCR and three months for MCR.

The Company opted for the standard formula under the Solvency II regime to calculate the SCR as the assumptions underlying the standard formula are considered to be a good fit for the Company's risk profile.

The Company was in full compliance with its regulatory capital requirements throughout the financial year and at 31 December 2023, the Company's eligible own funds amounting to €35,131,774 (2022: €28,013,730) were in excess of the required SCR.

### 3.4 Fair value measurement

The fair value of publicly traded investments is based on quoted market prices at the balance sheet date. At 31 December 2023 and 31 December 2022, the carrying amount of the Company's other financial assets and liabilities approximated their fair values. The following table presents the Company's assets that are measured at fair value at 31 December 2023, by level of the following fair

value measurement hierarchy:

• Quoted prices (unadjusted) in active markets for identical assets or liabilities (level 1).

• Inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (level 2).

• Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (level 3).

| Financial assets  | 2023<br>Level 1<br>€    | 2022<br>Level 1<br>€    |
|---|-------------------------|-------------------------|
| Fair value through profit or loss<br>- Equity securities, other variable yield securities and units in unit trusts – listed | 21,965,954              | 16,581,726              |
| - Listed debt securities  | 7,793,034<br>29,758,988 | 6,587,626<br>23,169,352 |

The Company's investments are traded in active markets is based on quoted market prices at the balance sheet date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency and those prices represent actual and regularly occurring market transactions on an arms length basis. The financial assets are included as level 1. The carrying amounts of cash and cash equivalents, financial investments at amortised cost, other financial assets and financial liabilities at amortised cost approximate their fair value.

#### 4. Insurance service expenses

|   | 2023<br>€               | 2022<br>€                    |

| Insurance service expense  | 4,713,618 | 4,015,204   |
| Other operating expenses   | 7,766,553 | 6,725,248   |

Fees charged by the auditor for services rendered during the financial period ended 31 December 2023 and 2022 amounted to:

|                          | 2023    | 2022   |
|--------------------------|---------|--------|
|                          | €       | €      |
| Annual statutory audit   | 92,500  | 54,300 |
| Other assurance services | 26,000  | 44,800 |
|                          | 118,500 | 99,100 |

Assurance work in connection to the adoption of IFRS 17 carried out as part of the 2023 audit are included within 'Annual statutory audit' fees.

Fees charged by affiliated entities for services rendered in relation to other non-audit services and tax compliance and advisory services amounted to  $\leq 2,360 (2022: \leq 3,000)$  and  $\leq 1,330 (2022: \leq 1,400)$ , respectively.

# 7. Staff costs

| 2023  | <b>3</b> 2022      |
|---|--------------------|
| •   | €                  |
| Salaries 4,187,593  | <b>3</b> 3,783,017 |
| Social security costs 225,65                                | <b>5</b> 201,532   |
| 4,413,248   | <b>3</b> 3,984,549 |
| The average number of persons employed during the year was: |                    |
| 2023  | <b>3</b> 2022      |
| Managerial 2  | <b>5</b> 18        |
| Technical 78  | <b>3</b> 77        |
| Administrative  | <b>5</b> 10        |
| 109   | • 105              |

Staff costs amounting to €10,855 (2022: €20,469) were reimbursed by related undertakings.

#### 8. Tax expenses

|  | 2023      | 2022        |
|--|-----------|-------------|
|  | €         | €           |
| Current tax expense                    | 1,758,828 | 369,719     |
| Deferred tax credit/(charge) (Note 19) | 188,008   | (1,539,651) |
| Deferred tax credit/(charge) (Note 19) | 1,946,836 | (1,169,932) |

The tax on the Company's profit before tax differs from the theoretical amount that would arise using the basic tax rate as follows: -

| 2023  | 2022        |
|---|-------------|
| Profit/(loss) before tax 9,144,867 (2         | (2,551,855) |
| Tax on profit at 35% 3,200,703                | (893,150)   |
| Adjusted for tax effect of:                   |             |
| Expense/(income) subject to reduced 26,081    | (59,141)    |
| rates of tax                                  |             |
| Expenses not deductible for tax 16,169        | 12,672      |
| purposes                                      |             |
| Net losses not deductible for tax (1,296,117) | 217,788     |
| purposes                                      |             |
| Net losses not deductible for tax -           | (448,101)   |
| purposes                                      | (1.1(0.000) |
| Tax expense         1,946,836         (2)     | (1,169,932) |

By virtue of the enactment of the 2022 Budget Implementation Act and the subsequent guidance note issued by the Commissioner for Inland Revenue ("the Commissioner") in November 2022, the transfers of shares, that are considered to be capital assets, which are listed or in the consequence of listing on a stock exchange recognised by the Commissioner are not subject to capital gains tax. As a consequence of this change in legislation, since 2022, the Company is no longer accounting for deferred tax on the unrealised fair value movements on foreign equities.

#### 9. Dividends

The Directors declared a net interim dividend of €2,200,000 during 2023 equivalent to 0.44 cents per share. The Directors do not propose the payment of a final dividend in respect of the financial year ended 31 December 2023. No dividend was declared during the year ended 31 December 2022.

# 10. Intangible assets

|                             | Computer Software |
|-----------------------------|-------------------|
| At 1 January 2022           | €                 |
| Cost                        | 1,166,056         |
| Accumulated amortisation    | (1,003,751)       |
| Net book amount             | 162,305           |
| Year ended 31 December 2022 |                   |
| Opening net book amount     | 162,305           |
| Amortisation charge         | (71,448)          |
| Closing net book amount     | 90,857            |
| At 31 December 2022         |                   |
| Cost                        | 1,166,056         |
| Accumulated amortisation    | (1,075,199)       |
| Net book amount             | 90,857            |
| Year ended 31 December 2023 |                   |
| Opening net book amount     | 90,857            |
| Additions                   | 168,884           |
| Amortisation charge         | (97,839)          |
| Closing net book amount     | 161,902           |
| At 31 December 2022         |                   |
| Cost                        | 1,334,940         |
| Accumulated amortisation    | (1,173,038)       |
| Net book amount             | 161,902           |

Amortisation of €97,839 (2022: €71,448) is included in other operating expenses in the statement of profit and loss.

#### 11. Tangible assets

|  | Land and<br>buildings | Right of use<br>assets | Office furniture<br>& equipment | Motor<br>vehicles | Total              |

#### 11.1 Fair value of land and buildings and investment property

The Company's land and buildings and investment property comprise of the Company's office building which houses the operations of the Company, as well as an additional office building in the vicinity of the former which is leased to third parties.

The Company's office building was revalued on 31 December 2022 by independent professionally qualified valuers. The valuation was conducted by a firm architect. The book value of the property was adjusted to the revaluation and the resultant surplus was credited to the revaluation reserve (refer to Note 18). The directors have reviewed the carrying amounts of the property as at 31 December 2023, on the basis of the assessments carried out by the independent property valuers. No adjustment to the carrying amounts were deemed necessary during the current financial year.

The Company is required to analyse non-financial assets carried at fair value by level of the fair value hierarchy within which the recurring fair value measurements are categorised in their entirety (Level 1, 2 or 3). The different levels of the fair value hierarchy have been defined as fair value measurements using:

- Quoted prices (unadjusted) in active markets for identical assets (Level 1);
- Inputs other than quoted prices included within Level 1 that are observable for the asset, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2);
- Inputs for the asset that are not based on observable market data (that is, unobservable inputs) (Level 3).

The recurring property fair value measurement at 31 December 2023 uses significant unobservable inputs and is accordingly categorised within Level 3 of the fair valuation hierarchy.

The Company's policy is to recognise transfers into and out of fair value hierarchy levels as of the beginning of the reporting period. There were no transfers between different levels of the fair value hierarchy during the year ended 31 December 2023.

A reconciliation from the opening balance to the closing balance of non-financial assets for recurring fair value measurements categorised within Level 3 of the value hierarchy, is reflected in the table above and in the notes to the financial statements.

# 11.2 Valuation processes property

The valuation of the property is performed regularly on the basis of valuation reports prepared by independent and qualified valuers. At the end of every reporting period, the Financial Controller (CFO) assesses whether any significant changes in the major inputs have been experienced since the last external valuation. The CFO reports to the Board on the outcome of this assessment.

When an external valuation report is prepared, the information provided to the valuers – and the assumptions and the valuation models used by the valuers – are reviewed by the CFO. This includes a review of fair value movements over the period. When the CFO considers that the valuation report is appropriate, the valuation report is recommended to the Board. The Board considers the valuation report as part of its overall responsibilities.

# 11.3 Valuation techniques

The Level 3 fair valuation of the Company's land and buildings and investment property (Note 12) was determined by using a comparative approach whereby the current selling prices and rental values of similar developments were compared in order to obtain an equitable value of the property. The significant unobservable inputs in the valuation include:

Equivalent rental values based on the actual location, type and quality of property supported by current market rents for similar properties.

Significant unobservable inputs

Information about fair value measurements using significant unobservable inputs (level 3)

| Description      | Fair value at<br>31 December 2023 | Valuation<br>technique                  | Value per square<br>metre |
|------------------|-----------------------------------|---|---------------------------|
|                  | €                                 |   | €                         |
| Office buildings | 15.1 million                      | Equivalent<br>value per<br>square metre | 4,900                     |

The higher the rental yield and the lower the capitalisation rate, the higher the fair value. Conversely, the lower the rental value and the higher the capitalisation rate, the lower the fair value.

# 11.4 Historical cost of land and buildings

If the land and buildings were stated on the historical cost basis, the amounts would be as follows:

| 2023  | 2022      |
|---|-----------|
| €   | €         |
| Cost         4,920,988           Accumulated depreciation         (385,627) |           |
| Net book amount 4,535,361   | 4,556,750 |

#### 11.5 Leases

The Company leases a number of branches. Rental contracts are typically made for fixed periods but may have extension options. Extension and termination options are included in a number of property leases across the Company. These are used to maximise operational flexibility in terms of managing the assets used in the Company's operations. The majority of extension and termination options held are exercisable only by the Company and not by the respective lessor.

Lease terms are negotiated on an individual basis and contain a wide range of different terms and conditions. The lease agreements do not impose any covenants other than the security interests in the leased assets that are held by the lessor. Leased assets may not be used as security for borrowing purposes.

The total cash payments for leases in 2023 was €147,260 (2022: €144,131). The contractual undiscounted cash flows attributable to lease liabilities as at 31 December 2023 are analysed in Note 3.2. The profit and loss account reflects the depreciation charge of right-of-use asset and interest charges for lease liabilities which are disclosed in note 11 and note 5 respectively.

The following table discloses the movement in lease liabilities during the year:

|   | 2023<br>€ | 2022<br>€ |
|---|-----------|-----------|
| Year ended 31 December                  |           |           |
| At beginning of year                    | 138,468   | 140,036   |
| Additions                               | 662,977   | 125,689   |
| Principal payments of lease liabilities | (147,260) | (144,131) |
| Interest expense                        | 8,792     | 16,874    |

Investment property comprises an office building acquired during 2013 which is leased out to third parties.

The property was fair valued as at 31 December 2022, by an independent firm of property valuers having appropriate recognized professional qualifications and experience in the location and category of the property being valued. Fair values are determined on the basis of open market value taking cognisance of the specific location of the property, the size of the site together with its development potential and the availability of the similar properties in the area. The Directors have reviewed the carrying amount of the property as at 31 December 2023, on the basis of the assessment carried out by the independent property valuers. No adjustments to the carrying amount were deemed necessary during the current financial year.

Disclosures required in terms of IFRS 13 in relation to fair value measurements attributable to investment property are presented in Note 11. Rental income generated from investment property is disclosed in note 5.

The financial information available below to the Company relates to the investment that is classified as an associate as at the balance sheet date.

|      | Assets  | Liabilities | Profit for the year |
|------|---------|-------------|---------------------|
|      | €       | €           | €                   |
| 2023 | 393,634 | 103,055     | 151,832             |
| 2022 | 505,204 | 152,319     | 217,480             |

The value of Goodwill arose in connection to the acquisition of a further stake in 2RS Elmo Insurance Managers Limited during 2019 and represents the payments in excess of the net assets acquired. During 2023, the Directors carried out an impairment assessment test the conclusion of which suggests that there is no scope for an impairment charge, after also considering the future dividend prospects of the Company.

2RS Elmo Insurance Managers reported revenues of €793,353 (2022: €714,608) and a net profit after tax of €151,832 (2022: €217,480) for the period from 1 January to 31 December 2023 of which the Company's share on the net profit was €75,157 (2022: €107,653).

# 15. Insurance contract liabilities and reinsurance contract assets

|                                    | 2023        | 2022       | 2021       |
|------------------------------------|-------------|------------|------------|
|                                    | €           | €          | €          |
| Insurance contract assets          | (249,820)   | (232,000)  | -          |
| Insurance contract liabilities     | 26,461,987  | 28,041,942 | 22,810,808 |
| Net insurance contract liabilities | 26,212,167  | 27,809,942 | 22,810,808 |
| Insurance contract assets          | 7,163,715   | 7,881,836  | 5,285,869  |
| Insurance contract liabilities     | (1,129,240) | (363,934)  | (73,540)   |
| Net insurance contract assets      | 6,034,475   | 7,517,902  | 5,212,329  |

Insurance contract assets / liabilities and reinsurance contract assets/ liabilities are considered to be substantially current in nature.

The liabilities for incurred claims reported are net of expected recoveries from salvage and subrogation. The amounts for salvage and subrogation at the end of 2023 and 2022 are not material.

The following reconciliations show how the net carrying amounts of insurance and reinsurance contracts changes during the year as a result of cash flows and amounts recognised in the statement of profit and loss and other comprehensive income.

The Company presents a table that separately analyses movements in the liabilities for remaining coverage and movements in the liabilities for incurred claims and reconciles these movements to the line items in the statement of profit and loss and other comprehensive income.

The tables below illustrate how estimates of cumulative claims have been developed over time on a gross and net of reinsurance basis. Each table shows how the estimates of total claims for each accident year have developed over time and reconciles the cumulative claims to the amount included in the statement of financial position.

The Company provides information on the claims development for the current reporting period and nine years prior to it. In order to reconcile undiscounted claims information for the nine years prior to the current reporting period (i.e. for the periods prior to the transition to IFRS 17) the Company included estimates of claim amounts based on accounting policies that existed prior to IFRS 17 adoption.

# 16. Other receivables

|  | 2023    | 2022    |
|--|---------|---------|
|  | €       | €       |
| Other receivables, accruals and<br>deferred income                                     |         |         |
| Other debtors  | 47,634  | 34,050  |
| Amount due from related parties (Note 23)  | 26,253  | 18,013  |
| Accrued interest   | 72,447  | 76,976  |
| Prepayments  | 333,860 | 480,745 |
|  | 480,194 | 609,784 |
| Amounts due from related parties are unsecured, interest-free and repayable on demand. |         |         |

#### 17. Share capital

|  | 2023<br>€ | 2022<br>€ |
|--|-----------|-----------|
| Authorised                               |           |           |
| 2,488,350 ordinary "A" shares of €1 each | 2,488,350 | 2,488,350 |
| 2,488,350 ordinary "B" shares of €1 each | 2,488,350 | 2,488,350 |
| 23,300 ordinary "C" shares of €1 each    | 23,300    | 23,300    |
|  | 5,000,000 | 5,000,000 |
| Issued and fully paid                    |           |           |
| 2,488,350 ordinary "A" shares of €1 each | 2,488,350 | 2,488,350 |
| 2,488,350 ordinary "B" shares of €1 each | 2,488,350 | 2,488,350 |
| 23,300 ordinary "C" shares of €1 each    | 23,300    | 23,300    |
|  | 5,000,000 | 5,000,000 |

"A", "B" and "C" ordinary shares rank pari passu in all respects except for the appointment of Directors. The holders of ordinary "A" and ordinary "B" shares have the right to appoint one director for every ten percent of the share capital held by reference to the nominal value of shares. The holders of ordinary "C" shares have the right to appoint one director.

#### 18. Revaluation reserve

|   | 2023      | 2022      |
|---|-----------|-----------|
|   | €         | €         |
| At 1 January and 31 December                      | 7,051,811 | 7,051,811 |
| The balance at 31 December is made up as follows: |           |           |
|   | 2023      | 2022      |
|   | €         | €         |
| Revaluation reserve arising on land and buildings | 7,051,811 | 7,051,811 |
| This reserve is not a distributable reserve.      |           |           |
| 19. Deferred taxation                             |           |           |

|  | 2023      | 2022        |
|--|-----------|-------------|
|  | €         | €           |
| Balance at 1 January   | 953,169   | 2,492,820   |
| Movements during the year recognised in:<br>Profit and loss account (Note 8) | 188,008   | (1,539,651) |
| Balance at 31 December – net   | 1,141,177 | 953,169     |

Deferred taxation is calculated on temporary differences under the liability method using a principal tax rate of 35% (2022: 35%) except for temporary differences on Land and Investment Property that are calculated under the liability method using the principal tax rates of either 8% or 10% of the revalued amount.

The year-end balance comprises:

|  | 2023      | 2022      |
|--|-----------|-----------|
|  | €         | €         |
| Temporary differences attributable to depreciation of fixed assets                 | (6,455)   | (6,850)   |
| Temporary differences attributable to fair value adjustments - investments         | (128,002) | (177,074) |
| Temporary differences attributable to revaluation of land and buildings            | 1,189,600 | 1,189,600 |
| Temporary differences attributable to revaluation of investment property           | 129,200   | 129,200   |
| Temporary differences attributable to provision for impairment of doubtful debtors | (46,501)  | (58,680)  |
| Temporary differences attributable to initial application of IFRS 17               | -         | (123,027) |
| Temporary differences attributable to other assets                                 | 3,335     | -         |
| Balance at 31 December – net   | 1,141,177 | 953,169   |

Deferred income tax assets are recognised for losses carry-forwards to the extent that the realisation of the related tax benefit through future taxable gains is probable. Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off a current asset against a current tax liability. The following amounts determined after appropriate offsetting are shown in the balance sheet:

|                        | 2023      | 2022      |
|------------------------|-----------|-----------|
|                        | €         | €         |
| Deferred tax asset     | (180,958) | (365,631) |
| Deferred tax liability | 1,322,135 | 1,318,800 |
|                        | 1,141,177 | 953,169   |

The above temporary differences are considered to be substantially non-current in nature.

# 20. Other payables

|  | 2023      | 2022    |
|--|-----------|---------|
|  | €         | €       |
| Other payables, accruals and other liabilities |           |         |
| Other payables                                 | 348,927   | 446,759 |
| Accrued expenses                               | 253,940   | 272,369 |
| Lease liabilities (Note 11)                    | 662,977   | 138,468 |
| Amounts due to related parties (Note 23)       | 13,909    | 9,712   |
|  | 1,279,753 | 867,308 |

The above other payables, with the exception of lease liabilities, are considered to be current in nature. The lease liabilities have been split into current and non-current as disclosed in Note 11.

### 21. Cash generated from operations

Reconciliation of profit/(loss) before tax to cash generated from operations:

|   | 2023                                   | 2022                                      |
|---|--|---|
|   | €                                      | €   |
| Insurance premium received, net of IACF 26,6            | 54,387                                 | 23,023,951                                |
| Reinsurance premiums paid, net of commission (7,15)     | 51,177)                                | (5,439,548)                               |
| Claims and other insurance service expenses paid (13,77 | 78,211)                                | (12,240,550)                              |
| Reinsurance claims received, net of commission 3,5      | 06,229                                 | 2,192,673                                 |
| Amortisation (Note 10) Depreciation (Note 11) 2         | 49,719)<br>97,839<br>42,113<br>(9,750) | 3,326,025<br>71,448<br>212,891<br>(1,361) |
| Payables (12  | 54,411<br>20,858)<br>45,264            | (31,596)<br>20,334<br>3,597,741           |

# 22. Cash and cash equivalents

For the purpose of the statement, of cash flows the year end cash and cash equivalents comprise the following:

|                                       | 2023      | 2022      |
|---------------------------------------|-----------|-----------|
|                                       | €         | €         |
| Cash at bank and in hand              | 6,396,995 | 9,307,274 |
| Interest bearing: - at floating rates | 2,102,262 | 2,606,902 |

The bank overdraft bears an interest rate of 4.60% (2022: 4.60%) is secured by a hypothec on selected financial instruments.
